

Construction Plans and Specifications Examples

Ingraham and Associates is fully experienced in preparing construction documents and specifications. Our landscape architects are registered and completely competent to exceed the client's and the contractor's expectations.

The construction plans we produce are very accurate and easy to read. We use AutoCad 2002 as our computer aided drafting program. We also print the plans in-house, eliminating expensive reproduction costs.

S-4(2571) PLANT MATERIALS

MNDOT standard specification 2571, Plant Installation shall be modified as follows:

- S-4.1 All plantings shall be as shown on the Plans, no substitutions shall be allowed without written approval from the Landscape Architect.
- S-4.2 Contractor shall make every effort to protect existing trees and roots within the garden areas. Cultivation shall be performed manually and no motorized equipment shall be allowed.
- S-4.3 All required inspections shall be performed by the project Landscape Architect.
- S-4.4 Existing turf grass in the garden area shall be removed manually with a sod cutter. Sod debris shall be removed from the site. Spraying of round up on existing turf shall not be allowed.
- S-4.5 Contractor shall perform a soil testing to determine level of organic matter, amount of Potassium and Phosphorous in the soil and soil PH and to determine appropriate fertilizer
