

Victory Memorial Parkway Landscape Plan Minneapolis, MN

After completing the Master Plan for Victory Memorial Parkway, the Ingraham & Associates team, consisting of Ingraham & Associates, WSB Engineers and Hess Roise, was rehired to develop the planting plan with the help of the MPRB staff. The plant pallet that we decided on consists of classical plants and trees to support the highly historic nature of the site. Our plantings also respected the memorial trees that were planted nearly 100 years ago.

Besides the plantings, we also designed user appropriate rest stops, and new signage. The Flag Memorial and the Lincoln Memorial hardscapes were not interfered with. The sidewalk linking the two memorials (opposite sides of the Parkway) was realigned to create a viewing corridor that further links the entire site together.
